

This is a great book that is definitely worth your time! It has many plot twists and it creates an image in your mind. It is based in a future where the world is flooded and I kept wondering how it happened.

This is the kind of book that you often dream of but rarely find. Once I finished I felt like I wanted to read it again. And again. And again. I don't have a favourite part because it was all awesome! I like how everything was revealed at the end. Overall I give it 5/5! I'd recommend it to people about 8-13.
